During the period, there was no material change in the funding and treasury policy of the Group. The Group has a share option scheme, under which the Company may grant share options to the participants, including directors and employees, to subscribe for shares of the Company.

## Market and Business Review, and Outlook

### Mobile Phone Business

The Group was involved in the business of wholesale and retail of mobile phones and telecom equipments in China. Although there was growth in the mobile phone market, the competition in the mobile phone retail market was very keen and the Group's performance in this area had been affected.

Customers focus is expected to gradually shift from the functionality of mobile phone to the shopping experience. Customers will normally require services such as function presentations, digital phone books synchronization and preinstalling software, etc, in purchasing a mobile phone. In the 3G & 4G era, the convergence of mobile telecommunications and the Internet also led to rapid development of value-added business which requires the retail channels to advance from a pure sales platform to an integrated service platform. In this regard, the large mobile telecommunication chain stores have advantages.

## **Mining**

The Group has been developing a new mining site exploitation system in Strontium mining site since 2010. After the expiration of a five-year mining exploitation permit on 25 September 2012, Sifa Mining has obtained a two-year permit with expiry date on 25 September 2014, but under which Sifa Mining has been restricted to exploration activities only over the mining site.

Nonetheless, the development plan and construction progress in this new system had been inevitably and adversely affected by the downturn of the global mineral resources demand in the second half of 2012 and up to date.

In 2014, the Group prepared documents as required under relevant rules and regulations and submitted the application to the Ministry of Land and Resources of the PRC (中華人民共和國國土資源部) (“MLR”) to obtain a mining exploitation permit for Strontium. Up to 27 March 2015, the application has been approved by relevant government authorities in Huangshi City and Hubei Province pending for final approval by the MLR.

On 27 April 2015, a mining operating permit was granted by MLR for a term of 2 years from 25 September 2014 to 25 September 2016 under which a restriction was added that no exploitation activities were allowed but only exploration activities. Such restriction imposed on the renewed mining permit was basically the same as the previous mining permit which was approved by MLR in 2012 whilst the application for mining exploitation permit is a continuing process.

Although it is expected that the downturn is temporary and only being a normal cyclic adjustment in the industry, the Board proceeded in a prudent way to restructure the overall construction schedule of this new mining system, by readjusting construction speed and time schedule for matching the industry cycle accordingly. Nevertheless, the Directors are also exploring all commercially viable opportunities to maximise the return from this investment, including finding potential buyers.

## Prospects

Mobile phone operating system, mobile internet application and other mobile/internet related businesses would surely be the key business areas that the Group is interested in since we have been in the mobile phone industry for decades. The Group is actively looking for further business and investment opportunities which will further enhance the shareholders' value.
